

ClearTrace for DOORS v1.4 (build 192.1) Release Notes
Ring-Zero Software, Inc.

Validated Ready for IBM Rational Software

Ready for IBM Rational software is the official offering through which selected Business Partner products are validated for integration with IBM Software Development Platform products. These products have met IBM specifications to help their integration with your in-house Rational software development environment.

Selecting Ready for IBM Rational software marked products aids in the smooth integration of partner "added-value" solutions. This mark identifies Business Partners working with IBM specifications for integration into IBM's open, comprehensive development environment based on Eclipse to help enable delivery of dynamic On Demand Business applications.

Benefits may include the following:

- Assurance that the Business Partner solution has been enabled, validated and is integrated to and compatible with the Rational family of products
- Increased time to value and Return On Investment
- Nondisruptive tools choices for development of business on demand projects

ClearQuest package updated to v1.6 – if you are upgrading, you must upgrade your database schema with the updated package for enhancements CTD00000039- CTD00000041 below.

ClearTrace Server Components requires **Microsoft Internet Information Server IIS v5.0** and **Microsoft .NET Framework v2.0**. The Server Components installer does not properly handle ordering of dependencies (IIS first, then .NET). This problem will be remedied when the vendor of the tool used to build our installers issues an update or fix.

History of Changes:

CTD00000012	Links could, in some cases, cause a DOORS requirement to be skipped during export	1.3
CTD00000013	Under certain conditions, daylight savings could be incorrectly reflected in ClearQuest, meaning time could be off by +1 hour	1.3
CTD00000014	Elimination of ClearQuest and DOORS "active user counts" in ClearTrace administrator	1.3
CTD00000015	Enhancement - Enable DOORS Requirement record type in ClearQuest schema (RZDoorsRequirement) to be extended by ClearQuest administrators. Custom attributes must be prefixed with "custom_". See CTD00000008.	1.3
CTD00000016	Enhancement - Upgrade of all ClearTrace components to Microsoft.NET Framework 2.0	1.3
CTD00000017	Installers do not register COM components properly under Microsoft.NET Framework 3.0	1.3
CTD00000018	DOORS table cells not mirrored in ClearQuest	1.3 SR1
CTD00000019	Large memory footprint when executing DOORS to ClearQuest profile	1.3 SR1
CTD00000020	Large memory footprint when viewing cached DOORS requirements from ClearQuest using View_Cached action	1.3 SR1
CTD00000021	Enhancement - auto-expand Database Root tree item when selecting DOORS modules in DOORS to ClearQuest and ClearQuest to DOORS profile wizards	1.3 SR1
CTD00000022	Wrong ClearQuest connection selected in DOORS to ClearQuest wizard when editing a profile	1.3 SR1

CTD00000023	Prevent selection of database root as destination folder in ClearQuest to DOORS profile wizard	1.3 SR1
CTD00000024	Making significant changes to ClearQuest to DOORS and DOORS to ClearQuest profiles resets profile execution time.	1.3 SR1
CTD00000025	Enhancement - added option to clone connections and profiles in ClearTrace Administrator	1.3 SR1
CTD00000026	Large memory footprint during population of cached requirements	1.3 SR2
CTD00000027	ClearQuest Addon does not properly detect DOORS version in locales for which decimal separator character is a comma	1.3 SR2
CTD00000028	Unable to view ClearQuest records linked to DOORS requirements when Oracle is used for ClearQuest database	1.3 SR2
CTD00000029	Package revision: added back-reference to RZDoorsRequirement which enables queries such as showing requirements which have not been associated to other ClearQuest records	1.3 SR2
CTD00000030	Enhancement - added help portal link to ClearTrace Administrator help menu	1.3 SR2
CTD00000031	Enhancement - added troubleshooting log links to ClearTrace Administrator help menu	1.3 SR2
CTD00000032	ClearTrace web application log folder requires manual adjustment of permissions to allow ASPNET user to create or write to log	1.3 SR2
CTD00000033	Export of DOORS views does not respect view sort order	1.3 SR3
CTD00000034	During import of new DOORS requirements into Clearquest, import of requirements which required codepage conversion could cause import to fail	1.3 SR3
CTD00000035	In ClearQuest, DOORS surrogate object sorting order could be incorrect.	1.3 SR3
CTD00000036	As of this this service release, all logs generated will use UTF-8 character encoding set rather than previous UTF-16	1.3 SR3
CTD00000037	Enhancement - added ability to exclude embedded OLE, History, and Links from ClearTrace cache	1.3 SR3
CTD00000038	In ClearTrace Administrator, views are missing from DOORS to ClearQuest Profile wizard	1.3 SR3
CTD00000039	Enhancement - added support for end-user extensibility of RZDoorsModule record type in ClearTrace schema package	1.4
CTD00000040	Enhancement - added support for end-user extensibility of submit/modify/delete notification hooks for RZDoorsRequirement and RZDoorsModule record types	1.4
CTD00000041	Enhancement - added support for mapping of custom attributes between DOORS module and RZDoorsModule record type, extends capabilities of Doors to Clearquest data profile	1.4

Depending on the terms of your support agreement, you can obtain support in a number of ways.
